Assignment of Study of Public Software Projects

Objective

Critically study one software application from the given list. Identify the positive and negative aspects of the site.

Methods

Each sessional group from each section will choose one site. They can also propose new software applications to study. The group members will use the site and interview others who have used it. The user experience in terms of functionality and performance (load tolerance) has to be explored. Each group has to submit a report by Jan 10, 2023 with their findings and recommendations.
